

Maurice Ombewa

Software Engineer | Full-Stack Developer | Python, JavaScript, Java, SQL, Go

Nairobi, Kenya | +254714981014 | ombewamaurice79@gmail.com | GitHub: github.com/MauriceOmbewa

LinkedIn: linkedin.com/in/maurice-ombewa-3631ab223 | Portfolio: ombewaportfolio.vercel.app

PROFESSIONAL SUMMARY

Software Engineer with 2+ years of hands-on experience building and maintaining full-stack web applications and REST APIs using Python (FastAPI), JavaScript/TypeScript (React, Angular) and relational databases (PostgreSQL, MySQL). Experienced with Git and GitHub workflows, code reviews, Docker and CI/CD in agile teams. Built business systems with M-Pesa payments, authentication and admin dashboards, and backend services in Java (Spring Boot), Python and Go. BSc in Information Technology. Eager to contribute to production code and grow under senior engineers.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, Go, SQL, HTML5, CSS3

Frameworks & Libraries: FastAPI, React, Angular, Spring Boot, Spring Data JPA, TailwindCSS

Databases: PostgreSQL, MySQL, Redis, relational database design, query optimization

Backend & APIs: REST API design and development, API integration, authentication and authorization, OAuth2 / Google SSO, M-Pesa payment integration, asynchronous processing, background workers

Version Control & DevOps: Git, GitHub, GitHub Actions, CI/CD, Docker, Linux, SSH, deployment automation

Practices: Agile development, code reviews, debugging and testing, performance tuning, technical documentation, secure development, Linux administration, technical support, networking fundamentals

PROFESSIONAL EXPERIENCE

Software Engineer | Softkit Limited | Sep 2025 - Present

- Build and maintain full-stack features across frontend (React, Angular, TypeScript) and backend (Python, FastAPI) in production web applications.
- Develop reusable UI components and improve frontend responsiveness and usability.
- Apply Redis caching and backend performance optimization techniques to improve application performance.
- Implement background workers and asynchronous task processing; participate in debugging, testing, performance tuning and peer code reviews in agile workflows using Git, Docker and Linux.

Software Engineer | Zone01 Kisumu | Jan 2024 - Aug 2025

- Developed and maintained secure REST APIs using Python and FastAPI for production systems.
- Built responsive, high-performance frontend applications using React, JavaScript, TypeScript, HTML and CSS.
- Designed and optimized SQL queries and database structures in PostgreSQL and MySQL to improve performance and reliability.
- Implemented asynchronous workflows and background task processing for system automation.
- Containerized applications with Docker, deployed to Linux servers, and worked with Git workflows, code reviews and CI/CD pipelines.
- Integrated AI-powered and LLM-based features into existing products; troubleshoot and resolved production issues to improve stability.

PROJECTS

[WaziLearn](#) | Angular, Java, Spring Boot

- Built a localized learning management system for the Kenyan curriculum with an Angular frontend and a Java Spring Boot backend.

[Sellora](#) | React, Python, PostgreSQL

- Built a SaaS platform for small and medium-sized businesses with a React frontend and a Python backend on PostgreSQL.

[Garisha](#) | Go, PostgreSQL, React, TypeScript

- Built a multi-branch automotive business management platform (car hire, vehicle sales, service, finance, employees, reporting) with a Go and PostgreSQL backend.

Kanisa Manager (Church Management Platform) | Angular, TypeScript, REST APIs

- Built church registration with M-Pesa payment integration, reactive forms, and finance and attendance analytics dashboards.

EDUCATION

Bachelor of Science in Information Technology | KCA University | 2020 - 2024
